Isfahan, Iran

ABOUT ME

I have +8 years of experience in backend development with PHP and Node.js, utilizing frameworks such as Laravel and NestJS, as well as frontend development with Vue, Nuxt, React, and Next.js.
Since 2020, I have focused on building applications with NestJS, Next.js, and Go, further honing my expertise in both backend and frontend technologies.
Additionally, I have a background in multitenant projects, microservices architecture, Kafka, socket programming, Turborepo, caching strategies, and queue management.

SKILLS

- Nodejs
- Nestjs Framework
- Typeorm & Prisma
- Custom JWT & ACL
- SocketIO
- Custom Libs
- Reactjs
- Nextjs Framework
- Turborepo
- React Query
- Redux & Zustand
- Featured Design
- Golang
- Gin Framework
- Gorm Orm
- Custom Commands
- Realtime Services
- Scheduler
- Docker
- Swagger
- Redis
- Caching
- Queue
- Microservice, Kafka

WORK EXPERIENCE

Front-end Developer

Avid Advice LLC Co. Yerevan, Armenia
October 2021 - October 2024

- Developing a multitenant web app with Next.js for workouts, advice, legal, etc
- Project development utilizes Turborepo to create components as an internal package and handle multiple web apps in one source code
- Using the Mantine UI library and Tailwind CSS

Web Developer

Barname Sazan Co. Isfahan, Iran
May 2016 - May 2017

- Developing websites using Laravel and Vue.js
- Implementing front-end web design and collaborating with clients to gather performance feedback
- Delivering application and website designs within project scope and meeting deadlines

LONG-TERM PROJECTS

- **Social Media Platform**

Social media platform designed to help users achieve their business goals and enhance their visibility. The backend of the platform is built using a microservices architecture with Java, while the frontend is developed using Turborepo and Next.js. Key features of the platform include a store, social media system, chat, online sessions and classes, various management sections, support for different businesses, and a website builder.
