

About Me

Software engineer with 8+ years of experience building scalable web applications using Node.js, NestJS, React, and Next.js. Focused on both backend and frontend development, with strong expertise in clean code, feature-driven design, shared libraries, socket programming, caching, queue management, and Turborepo-based monorepos. Dedicated to delivering maintainable and high-performance solutions.

Backend Skills	Frontend Skills	Architecture & Coding
• Nodejs, NestJS • TypeORM & Prisma • Custom JWT & ACL • Redis & Caching • Socket.IO • Swagger & Api Docs	• Reactjs, Nextjs • Turborepo • React Query • Redux & Zustand • Material UI, Mantine UI • Tailwind CSS	• Clean Code • Featured & Atomic Design • Monorepo Management • Type-safe Development • Biome, ESLint & Prettier • Husky (Git Hooks)

Work Experience

• AllinGo Full-time Aug 2025 - Present	→ Utilizing Turborepo for efficient Monorepo management , handling multiple web applications and shared UI component libraries in a unified codebase → Built customer-facing apps and dashboards with React, Vite, and Next.js → Implemented consistent, scalable UI using MUI and Tailwind CSS → Handled global state with Zustand and enabled secure cross-app authentication via shared cookies → Applied Atomic Design principles and a feature-based component architecture to build scalable, modular, and maintainable UI systems across the platform
• Freelance Flexible-time Oct 2024 - Jun 2025	→ Web Apps & PWAs: Cross-platform, performant apps → Mini-Apps (TMA): Seamless third-party platform integration → Backend: Node.js, NestJS, Prisma, TypeORM → Frontend: React.js, Next.js, TurboRepo, Mantine
• Avid Advice Full-time Oct 2021 - Oct 2024	→ Multitenant web app with Next.js for workouts, advice, legal, etc. → Used Turborepo for managing 5 web applications & 12 shared libraries → Using the Mantine UI library and Tailwind CSS → Online class sessions, enabling real-time communication → Page builder and admin panel for managing all content, users, sellers
• Karizor Part-time Sep 2023 - Mar 2024	→ Microservices Architecture with Kafka → Developed eight microservice using NestJS & Lumen → Real-time Notifications implementation → Device Activity Logger for tracking device activities
• Alert Part-time Jan 2023 - Sep 2023	→ Microservices Architecture with Kafka & Redis → Developed five microservice using NestJS & Lumen → Real-time Notifications implementation → Operator Activity Logger for tracking user actions
• Telebourse Full-time Dec 2020 - Feb 2022	→ Utilizing web scraping techniques to gather stock market information → Designing and developing various financial charts → Backend development using Nestjs and Lumen apps, Frontend Nuxtjs
• Behina Gostar Nano Full-time Nov 2019 - Nov 2020	→ Working on a comprehensive business system project → Developing backend apps using Nest.js and Laravel → Built web interfaces using Nuxt.js and Nextjs for various web apps
• Parmand Full-time May 2018 - Sep 2019	→ Development of shopping and entertainment projects → Backend development using Laravel and Nest.js, Frontend Nuxtjs → Integration of payment gateway for secure transactions
• Pardad Pardazesh Full-time Aug 2017 - May 2018	→ Development of the marketer management project → Developing backend apps using Lumen and Nest.js, Frontend Nuxtjs → Implementation of a dashboard for marketers
• Barname Sazan Full-time May 2016 - May 2017	→ Developed Frontend for websites using Blade and Reactjs → Educational Platform and Legal Website

Long-Term Projects

- **Allingo, Aggregator Platform**

Built a multi-web-app platform (Next.js landing, React + Vite client & admin dashboards) that aggregates ride, delivery, and food services, allowing users to compare the fastest, cheapest, and most available options in one place. Used MUI + Tailwind CSS for scalable, responsive UI.

- **Social Media Platform**

Social media platform designed to help users achieve their business goals and enhance their visibility. The backend of the platform is built using a microservices architecture with Java, while the frontend is developed using Turborepo and Next.js. Key features of the platform include a store, social media system, chat, online sessions and classes, various management sections, support for different businesses, and a website builder.

- **Digital Brand Boards**

The Digital Advertising Boards project was built with NestJS and Lumen, featuring eight microservices. The system allowed an Android app to communicate with the backend, enabling to display programs on digital billboards. The admin panel provided tools for designing ads program for various billboard sizes and scheduling content for each model, ensuring dynamic, time-based display management.

Short-Term Projects

- **Gamely Landing**

The Phase One of a modern, responsive web application built using React, Next.js, and TypeScript. The UI is designed with Mantine UI and Tabler Icons, optimized for both desktop and mobile.

<https://youtu.be/KiarzuhU7n0?si=gmq7Q1X9xN2M8nGz>

- **Sadeghi Customs**

Management panel for Sadeghi Customs, an auto detailing center, using Nest.js and Angular. The management dashboard was designed and implemented to oversee the center's activities.
