

Mostafa Gholami

Senior Full-Stack Developer | NestJS • Next.js • Turborepo

mostafagholamidev@gmail.com • +98 936 589 5522 • mst-ghi.github.io • LinkedIn • GitHub
Tehran, Iran | Open to Remote Opportunities

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 9+ years of experience designing and building scalable web platforms using NestJS, Next.js, Golang, and Turborepo. Specialized in monorepo architectures, multi-tenant systems, real-time features, and clean maintainable codebases. Experienced in mobile development with React Native. Proven track record of delivering complex products from architecture to production for startups and established companies.

TECHNICAL SKILLS

Core Stack	NestJS • Node.js • Golang • Next.js • React • TypeScript • Turborepo
Backend	Prisma • TypeORM • Redis • Socket.IO • Kafka • JWT / ACL • Microservices
Frontend & Mobile	React Query • Zustand • React Native • Mantine UI • Material UI • Tailwind CSS
Engineering Practices	System Design • Clean Architecture • Code Review • CI/CD • Testing • Performance Optimization
Soft Skills	Technical Communication • Mentoring • Ownership • Problem Solving • Cross-functional Collaboration

WORK EXPERIENCE

Senior Full-Stack Developer AllinGo • Full-time	Aug 2025 – Present Remote / Iran
- Led monorepo architecture using Turborepo across multiple web applications and shared UI component libraries, improving code reuse and development velocity. - Built customer-facing applications and admin dashboards with React, Vite, and Next.js, applying Atomic Design and feature-based architecture. - Implemented consistent, scalable UI systems with MUI + Tailwind CSS and global state management using Zustand. - Enabled secure cross-app authentication via shared cookies for seamless user experience across the platform.	
Full-Stack Developer Freelance • Flexible-time	Oct 2024 – Jun 2025 Remote
- Delivered cross-platform web apps, Progressive Web Apps (PWAs), and mobile applications using React Native. - Developed Telegram Mini Apps (TMA) with seamless third-party platform integration. - Built full-stack solutions using NestJS, Golang, Prisma/TypeORM on the backend and React/Next.js + Mantine on the frontend.	
Full-Stack Developer Avid Advice • Full-time	Oct 2021 – Oct 2024 Iran
- Architected and developed a large multi-tenant platform consisting of 5 web applications and 12 shared libraries using Turborepo and Next.js. - Built real-time online class sessions and communication features enabling live interaction between users. - Designed and implemented a flexible page builder and comprehensive admin panel for managing content, users, and sellers. - Utilized Mantine UI + Tailwind CSS to create a consistent and scalable design system across all applications.	
Backend Developer Karizor • Part-time	Sep 2023 – Mar 2024 Iran
- Designed and developed 8 microservices using NestJS and Lumen with Kafka as the message broker. - Implemented real-time notifications and a device activity logger for tracking system events.	
Backend Developer Alert • Part-time	Jan 2023 – Sep 2023 Iran
- Built 5 microservices using NestJS and Lumen with Kafka and Redis for an intelligent fire safety and emergency system (IoT). - Implemented real-time notifications and operator activity logging for monitoring and auditing.	
Full-Stack Developer Telebourse • Full-time	Dec 2020 – Feb 2022 Iran
- Developed stock market data aggregation using web scraping techniques and designed multiple financial charting components. - Built backend services with NestJS and Lumen, and frontend applications with Nuxt.js.	

SELECTED PROJECTS

Allingo – Multi-Service Aggregator Platform

Multi-app platform (Next.js landing + React/Vite client & admin dashboards) that aggregates ride, delivery, and food services. Users can compare the fastest, cheapest, and most available options in one place. Built with Turborepo, MUI, and Tailwind CSS.

AvidBizz – Social & Business Platform

Large-scale social media and business platform featuring store, chat, online sessions/classes, multi-business support, and a website builder. Frontend built with Turborepo + Next.js; backend uses microservices architecture.
[avidbizz.com](#) • [seller.avidbizz.com](#) • [builder.avidbizz.com](#)

Karizor – Digital Brand Boards

Digital advertising boards system with 8 microservices (NestJS + Lumen). Android app communicates with backend to display scheduled content on various billboard sizes. Includes advanced admin tools for designing and scheduling ad programs.
[karizor.com](#)

Alert.ir – Intelligent Fire Fighting System

IoT-based fire safety and emergency services platform. Microservices architecture with NestJS, Lumen, Kafka, and Redis. Real-time monitoring, alerts, and operator dashboards.
