ABOUT ME

I have over 8 years of experience in frontend development with frameworks such as Vue, Nuxt, React, and Next.js. I excel in building user-friendly interfaces, leveraging design systems, and implementing complex client-side functionality. Since 2020, I have focused on creating scalable applications using React and Next.js.

SKILLS

- Reactjs
- Nextjs Framework
- React Query
- Zustand
- Redux
- Typescript
- Mantine UI
- Material UI
- Tailwind CSS
- Atomic Design
- Featured Design
- Custom UI
- Turborepo
- Docker
- Swagger
- Cookie & others
- High Performance
- Shared Components

WORK EXPERIENCE

- **Avid Advice**
  Full-time
  October 2021 - October 2024
  https://avidadvice.com/
  https://avidbizz.com/

  ⇢ Developed a multitenant web application with Next.js
  ⇢ Used Turborepo for managing 5 web applications & 12 shared libraries

- **Barname Sazan**
  Full-time
  May 2016 - May 2017
  ~~Without Link~~

  ⇢ Developed Frontend for websites using Blade and Reactjs
  ⇢ Educational Platform and Legal Website

LONG-TERM PROJECTS

- **Digital Brand Boards**

  The Digital Advertising Boards project was built with NestJS and Lumen, featuring eight microservices. The system allowed an Android app to communicate with the backend, enabling to display programs on digital billboards. The admin panel provided tools for designing ads program for various billboard sizes and scheduling content for each model, ensuring dynamic, time-based display management.

- **Social Media Platform**

  Social media platform designed to help users achieve their business goals and enhance their visibility. The backend of the platform is built using a microservices architecture with Java, while the frontend is developed using Turborepo and Next.js. Key features of the platform include a store, social media system, chat, online sessions and classes, various management sections, support for different businesses, and a website builder.
